Class Quiz

The class quiz is a core component of the SEEN Programme and enables the team to gather data about the schools and classes that have completed the lessons. Every class that delivers the lesson should complete this quiz and there is a direct link to it in lesson 3.

The quiz contains questions on the following topics:

- School and class data – e.g., school name, class year, number of pupils in class.
- Whether pupils think other young people should receive these lessons in school.
- An optional true false quiz – intended as a hands-up activity. Consists of 12 questions, takes approximately 20 minutes.
- Short feedback questions for the class teacher.
